

# PROJECT PLAN DOCUMENT

Project number	36
Project Title	Website and Application with interface for disabled people
Document	Project Plan
Creation date	16.02.2023
Created By	Rayaan Khan, Yash Shivhare, Talib Siddiqui, Khushi Wadhwa
Client	Dr Anita Rego, CEO of PEARLSS4DEVELOPMENT

## Brief problem statement

*The goal is to provide a more efficient way for these individuals to communicate and navigate through the existing "AmitaCare" website by creating an application that could book an appointment and checking your illness by your symptoms. Sending the meet details to the doctor and the patient via email.*

*Plus allowing the user to create their ABHA number if not already made to integrate the data to government database.*

## Team Members

- 1. Rayaan Khan – Frontend, integration with ABHA, login-signup page*
- 2. Yash Shivhare – Frontend, implementing Knidia symptoms checker, login-signup page*
- 3. Talib Siddiqui – Backend, integration with ABHA, appointment booking interface*
- 4. Khushi Wadhwa – Backend, implementing Knidia symptoms checker, appointment booking interface*

## Team Communication

The team has been communicating via Google Meet to discuss about the progress. It has been scheduled every Thursday at 8:30 PM with the client.

Sessions of physical meet is also organized to work on the project and integrate its various components.

Any updates are being communicated regularly via Whatsapp.

## Development Environment

For App development – React Native/ Flutter, SQL, Android Studio
